Raupuha Stud

14th November 2023 Ram SALE Russell & Mavis Proffit

Welcome you to Raupuha Stud for our
8th On Farm Ram Sale, 12 noon start.

The Proffit family invite you to our 8th annual Ram Sale, our 46th year of selling Rams in NZ. We are extremely proud to be able to put 200 rams up for sale representing 5 breeds that are part of our operation down in the beautiful Mahoenui Valley. If private sale is your choice, Rams are still available. These private sales start the week after the Ram Auction.

We have just ticked over 15 years of having the stud under our management & not a day goes by where I don't shake my head and think about Mum & Dad's great work and foresight starting this operation, especially Dad's foresight to start Ram Guard testing sires in 1999. We have just completed our 24th year of testing and finally reached .6. We tested 57 Perendale & Romdale 2th Rams @ .6 this year with 40% pass rate results. We are still the only Perendale & Romdale flock in NZ testing to this level and the only Perendale & Romdale breeders to be accepted in the "FE Gold" group and able to use the "FE Gold" brand. We are very proud to be part of FE Gold. Breeding for FE Tolerances has meant some big sacrifices along the way.

The last 7 years we have been totally DNA all lamb groups to verify parentage. The Perendale & Romdale flock have moved to full 5k genomics testing.

Raupuha Stud is proud to offer Beltex X 2th rams again at this year's sale. These rams are only 1/4 Beltex but they do have some different characteristics. Their performance looks very similar to the Suflex. The Suffolk, Suflex & Beltex are all run in conjunction with our Perendale & Romdale flocks. Last year we purchased all 330 Raymond Harrie Mangrae stud Suffolk & Suflex ewes. This year we offer 20 of them at our sale. Raymond did not have these on Sil so the figures are very low on them but some very good sheep amongst them.

We enjoy working with and challenging scientists on anything farming related to improve the future of our magnificent industry for us and generations to come. We are very involved in developing a new non-invasive eczema test. We see this as being very important for NZ's agricultural future.

Regarding Nprove (Sil) and figures we are trying to maintain the best practice and are working hard on linking our flock with other flocks around NZ, which means we have Rams involved with progeny trials around the country. We also work closely with other Breeders, sharing rams in the same mating season. This gives us good linkage which is very important with Nprove single step program which compares every breeder around NZ. We recommend you use the Nprove figures to compare a group of rams you are happy with first.

This year we asked the public for nominations of which charity/organisation to support and we drew a name out of a hat and the lucky winners are Piopio Volunteer Fire Brigade. Lot # 111 is the ram. They're a great bunch of Volunteers who work tirelessly for our great local community. With their rules and regulations getting more frustrating to deal with.

We again have asked local businesses that we use to support our sale catalogue and I have never been turned down yet, so if you get a chance please support any of these local businesses, we really do appreciate their support.

Bidr is available at the sale again this year so if you can't make it to the sale but are keen to have a look at rams beforehand, please don't hesitate to contact us or your local agent and arrange a private viewing. We have an Open Day planned for October 31st 1pm – 3pm

I would really like to acknowledge all friends & Family, staff & businesses that have supported Raupuha Stud over the past 12 months. We look forward to working with you all over the next 12 months.

We pride ourselves on offering great services but sometimes we can be forgetful. Please get in touch with us if you think we have missed something or you need to know anything.

Please come along and have a look at the sale and try out some of the fantastic food, refreshments & hospitality we have available. If you have any questions please don't hesitate to contact us.

Thank you.

Russell & Mavis Proffit

PURCHASING REBATE

All intending purchasers MUST register at the sales office prior to the sale.

A purchasing rebate of 6% will be paid to non participating livestock companies and recognized independent livestock agents with approved credit facilities introducing and/or accompanying new buyers to the sale.

Arrangements must be made with the auctioneer PRIOR TO THE SALE AND SETTLEMENT MADE ON THE BUYERS BEHALF WITHIN 14 DAYS.

UNDERSTANDING NZGE INFORMATION

The data used to populate this catalogue is generated by The New Zealand Genetic Evaluation (NZGE) which is managed by Beef + Lamb New Zealand (B+LNZ) Genetics.

THE NEW ZEALAND GENETIC EVALUATION

The NZGE is the national across-flock and across-breed sheep evaluation that identifies the best rams for economic traits. It objectively “compares” the performance of various traits – making it a powerful source of genetic information for breeders and commercial farmers.

MEASURES OF GENETIC MERIT

Breeding values are termed as “gBV” (genomically informed breeding value). For simplicity, the breeding value for animals with no genomic information is still denoted as gBV, as it comes from the same analysis.

They are expressed in the units the trait is measured in (e.g. kg for weight, number of worm eggs in faeces) and are an estimate of the value of a ram’s genetic merit for the trait. Generally, a more positive gBV is more favourable, but there are some exceptions (e.g. less worm eggs are more favourable).

Indexes are created with the commercial farmer in mind. An index is an economic value applied to a grouping of gBVs. A positive economic value is always more favourable.

B+LNZ GENETICS - CONTACT DETAILS

For more information email: info@blnzgenetics.com, or phone 0800 745 435

PLEASE NOTE: B+LNZ Genetics and Raupuha Stud have used NZGE Analysis GE40917 from 13th October 2023.

NEW ZEALAND GENETICS EVALUATION INDEXES

PERENDALE & ROMDALE INDEX EXPLANATIONS

The advertisement for Daryl & Jules is set against a background of vertical wooden planks. At the top, the names "DARYL & JULES" are written in a large, bold, sans-serif font. Below the names, the contact information is listed: "D Tucker & J Taitoko", "947 Aria Rd • Aria 3979", "07 877 7823 • 027 664 1816", and "h.tucker@xtra.co.nz". To the right of the text, there is a photograph of a farmstay accommodation. The photo shows a long, narrow room with a wooden floor and a wooden railing. There are several tables and chairs set up along the railing. The room appears to be a common area or a dining area. The photo is framed by a thick, light-colored rope that runs horizontally across the top and bottom of the advertisement.

AgResearch

AgResearch researchers are very grateful for the ongoing support that the Raupuha team provide to their research, especially the passion and enthusiasm that Russell brings, together with the challenges he lays down to us and our science to continually progress our research for the greater good of the New Zealand sheep industry. Raupuha was one of the first studs to commercially use the Portable Accumulation Chamber in 2019 to measure methane emissions, helping fine-tune the protocols in a commercial setting, and are amongst just a handful of breeders who have tested every year since the chambers hit the road. On the Facial Eczema front, Raupuha have been at the forefront of supporting research, as members from the AgResearch Animal Genomics team attempt to better understand the biology of why some animals are more tolerant to FE than others. Whilst the research is still a work in progress, Raupuha's efforts this year have produced some promising leads. Additionally, Raupuha have been actively contributing to research led by the AgResearch Animal Health team, with funding from Beef + Lamb New Zealand, as they strive to replace the current RamGuard protocol with a lab test that only involves taking a blood or tissue sample which is tested in the lab, which again although a work in progress the results of this also look promising.

Raupuha Stud Ram Care Guide

ALL RAMS FROM RAUPUHA STUD BEFORE BUYING ARE

Tested clear for **Brucellosis** (this is carried out annually by a vet through palpation and blood testing). Brucellosis is a bacterial infection of the scrotum that will reduce fertility.

Have a **quarantine ZOLVIX PLUS drench** before leaving Mahoenui property.

They received a **clostridial vaccinated** 8 in 1 (Coglavax) - 25/09/2023

Cyrex Jetting Dip - 31/10/2023

ARRIVING HOME

If you have purchased a single animal it is ideal to have a couple older ewes (dog tuckers will do) for company. We recommend to leave them separate from older Rams as the new rams are still young and developing. They do not want to be put in the Ram paddock and forgetting about until mating time.

1-2 MONTHS BEFORE MATING

Check on your rams Body Condition, they should ideally be **BCS 3.5**. If they are too light they will require additional feeding. If they are overweight, exercise them if possible and reduce available feed – they need to be fit and healthy for the job ahead. We recommend walking them between paddocks at least a couple of times a week to keep them active.

Check scrotums for **scrotal mange** as this can cause temporary infertility until treated (thickened skin and bumps or scabs across the surface).

FACIAL ECZEMA

Remember that FE seriously affects sperm quality. **Terminal** sires should receive Zinc boluses, Time Capsules last 6 weeks so should ideally be given 6 weeks prior to ram going out and then again at Joining. Maternal rams bred for FE tolerance may still have reduced fertility during high spore counts, Raupuha Rams have been bred for FE Tolerance but unfortunately they are not 100% tolerant to FE in a real bad year.

DURING THE RAMS LIFE

Rams need to be fully **clostridial vaccinated** (annual boosters), this should ideally be an 8 in 1 (Coglavax). Get Brucellosis blood test done ever year on all older rams.

DRENCHES & TRACE ELEMENTS

Remember that whatever you decide your ewes require during a season, whether it is a fly treatment, Barbers pole drench, terminal rams are very susceptible to this. B12 your rams if needed!

IF YOU HAVE ANY ISSUES WITH YOU RAMS PLEASE DO NOT HESITATE TO CONTACT ME

King Country River Care

Supporting resilient and thriving rural communities

Established in 2018, King Country River Care (KCRC) is an incorporated society taking a long-term view to caring for our environment, our people, and our communities.

Our actions support rural communities extending from Mokau to Kawhia and across to Benneydale.

There are roughly 350 farming businesses in the KCRC region, covering a total estimated catchment area of 2800 square kilometres.

 If you would like to know more or get involved contact us through our facebook page [@kcrivercare](https://www.facebook.com/kcrivercare) or email kcrivercare@gmail.com

INFORMING BEEF NZ TOUR TO CANADA & USA

I was lucky enough as President of our amazing Shorthorn breed to be invited on the NZ Informing Beef Tour of Canada and The States. I'll give a brief overview of the trip and will present a slide show at next year's AGM Herd Tour.

Before the official trip started, I went 1½ hours north of Calgary to Rocky Mountain House Area and visited Shorthorn breeder Kirk Seaborn of Crooked Post Shorthorn. It was a challenging area to farm with 90 frost free days a year. So not a lot of growing time. He was sending bulls away to be tested for feed efficiency and had the highest IMF figured bull from USA on farm, unfortunately he had scurs and looked a bit plain in the back end.

Back in Calgary, we met up with the rest of the group that were attending the BIF (Beef Improvement Federation) Conference. 3 x Beef + Lamb NZ, 3 x Hereford, 3 x Angus, 1 x PBB, 1 x AngusPRO and 2 from Simmental. A great bunch of people with some very robust discussions had while driving around, with hopefully a lot more collaboration to come between the breeds and Beef + Lamb NZ for the benefit of the whole NZ Beef industry.

The BIF was three days of guest speakers with a big focus on Environmental Sustainability with a big investment in Methane and feed efficiency. Some good discussion on Genomics, Marketing and Camera technology to be able to collect phenotype data. A lot to take in. Also, how collecting good raw data and as much as possible is still very important. **“Garbage in = Garbage out”**

DAY 1 - USA Road Trip

From Calgary to Bozeman Montana a little bit of sightseeing up the big sky area in Yellow Stone National Park before a visit to IGS in Bozeman. The team from IGS talked as though their philosophy and how their analysis worked. 22 million animals run weekly in one analysis incorporating a lot of genomics. They encourage raw data.

They are very open to anyone joining their analysis and getting new traits developed like Gestation Length. I believe if NZ as a country wanted to go to an across breed analysis, IGS would be the first place to investigate. Drove to Billings Montana for the night.

DAY 2 - Billings Montana to Rawlins Wyoming

Went to visit Padlock Ranch 43,000 acres owned by the Scott Family. 11,000 Cows 13,000 head feed lot costing approximately \$5/day to feed cattle. Not a very long growing season, some irrigation used and rotational grazing of young stock on better country. Their biggest challenges are costs and running reservation land. The biggest opportunity is water efficiency. Using it more wisely. Staff employed do most of the work on horseback and rope cattle when working with them. Drove to Rawlins Wyoming

DAY 3 - Rawlins Wyoming to Fort Collins Colorado

Drove to Saratoga Wyoming to visit J Rouse Colorado University Research Farm. A ranch gifted to the University by the Rouse Family for research.

The farm is at 8,000ft with some big challenges like long cold winters and altitude sickness (Heart diseases). They are coming up with ways to measure it and breed for it. A lot of the breeders in America are starting to collect data for it and are getting EPDs for it. And then a magic drive from the Rouse ranch to Fort Collins through the Bow Mountain Area. We drove to 10,000ft amazing scenery would be bloody cold up there in the winter and lucky enough on the way down we saw a moose on the side of the road.

DAY 4 - Fort Collins Colorado

We went out to Leachmans Cattle Company and Kent Anderson from Zoetis spoke to us about genomics and how it is helping Bull Breeders and commercial farmers make huge gains in the beef industry. Lee Leachman spoke to us about his across breed analysis which he set up and has 35,000 new calves going into it every year. Leachman Cattle Company sells 2,500 bulls pa which is about 1% of the bull sale market in the USA. Lees advice measure everything you can worry about what you are not measuring. We had a drive around part of their ranch land and looked at some of their cows and calves, which were getting rotated around with temporary wires.

DAY 5 - Fort Collins Colorado to Denver Colorado

A short drive to Colorado State University where we had a good run down of history of Colorado State University. The talk about meat research they are currently doing and Methane feed efficiency they are working on. More of a rundown on Heart disease.

We drove towards Denver where we visited Rocky Mountain AI centre and viewed a couple bulls that are getting collected for NZ.

DAY 6 - Denver Colorado to Dodge Centre Kansas

Just a six-hour drive across some of Americas vast countryside, windmills for power, crops, tractors feed lots etc.

DAY 7 - Dodge Centre Kansas to Wichita Kansas

A Visit to Boot Hill Museum in Dodge Centre which was an interesting look at some of the history of the area and wild Buffalo trade. Then a one-hour drive to Gardiner ranch, one of the largest Angus Studs in America running four sales a year selling 2,500 bulls in total. Mark Gardiner gave some great advice and wisdom about what makes him tick. He has not used a bull on his property for 60 years all AI or ET. They sell a lot of heifers then buy the progeny back

for the feed lot or bull sale. Mark has invested a lot of money into the meat industry, purchasing a share in a meat company and paying premiums for high marbling cattle. Then we had a quick look around the feed lot which had some freshly weaned calves. Followed by a three-hour drive to Saratoga Kansas.

DAY 8 - Saratoga, Kansas to Hastings Nebraska

Drove to Manhattan to Visit Kansas State University where we spoke to some very passionate animal scientists about research, methane, feed efficiency, genomics and water intake. We had a good visit around their sheep and goat research sheds. The only reason they really have sheep/Goats is for young students to handle smaller animals. Then a three-hour drive to Hastings Nebraska

DAY 9 - Hastings Nebraska to St Joseph Missouri

A short trip to the Clay Centre, the Biggest Beef research farm in the world. 38,000 acre research farm where they ran an 8,000 cow cross breed analysis since 1969. Then off to St Joseph Missouri

DAY 10 - St Joseph Missouri to Kansas City Missouri

A short 10 min car ride to Angus America where we sat down and had breakfast with all of the staff and listened to the President of the Angus Youth give a rundown of recent events. A very impressive youth program - very well supported. Then up to the board room to talk about Angus Americas operation. 230 staff \$70m turnover, 12 million animals in the

analysis, 300,000 new calves registered ever year with 200,000 of them genotyped.

A one-hour drive to Kansas City to Vytelle where a very passionate CEO informed us of Vytelle drive in leading the industry in collecting feed efficiency data and embryo transfer work. They have just opened a lab in Hamilton NZ.

DAY 11 - Kansas City Missouri to Houston Texas to Auckland NZ

The flight from Kansas City to Houston Texas where we drove to ST Genetics, a company specialising in the field of reproductive genetics – including a state of the art DNA lab offering programmes including embryo production and genomic testing based off their semen sexing technology. We left Houston at 39 degrees and arrived back at Auckland airport at 6 degrees.

An amazing trip and opportunity to remember. We traveled 2,500 miles in 10 days. I believe there are some real benefits to come out of it for the NZ Beef industry moving forward, with better collaboration between NZ Breeds and Beef + Lamb NZ, also some overseas research. If we can link NZ research with overseas research this will give us a way bigger data set. It's great that the Shorthorn Breed is at the table being involved in some of these discussions.

A big thank you to MPI, Beef + Lamb NZ, Beef & Lamb Genetics and NZ Beef Shorthorn for supporting me on this trip.

RUSSELL PROFFIT

LIFE MEMBERSHIP FOR THE PERENDALE SHEEP SOCIETY

In May of this year during the NZ Perendale AGM & Ward tour through the King Country and Taranaki, two very special honours were handed out. Life Membership for the Perendale Sheep Society was awarded to Lyn Proffit and to Jeff Proffit posthumously. Surrounded by family, friends and NZ Perendale members Lyn was surprised by the request to come up on stage and the emotions all round were obvious to see.

Jeff and Lyn Proffit are the founders of the Raupuha Stud. They have been involved in the Perendale Sheep Society and the Shorthorn Society from the beginning. Over their 45 year involvement with the Perendale Sheep Society, they have between the two of them covered many roles within the Society and that community. From Wool competitions, setting up the North Island Ram Fair, Meat competitions, running a Perendale stand at the National Fieldays to President and Secretary for many events.

Keep it in the family? 30 years ago Jeff was President of the Perendale Sheep Society and this year Russell has taken on that role, looks like the involvement with the breed is to continue for a lot longer yet.

Become a farmer of the future...

We are looking for Farm Trainers and Students for 2023

Our structured programme offers an array of industry training, NZQA learning & extensive practical work experience alongside outstanding farmers in our community

- 2 Year Programme
- Zero Fees
- Practical workplace training and development
- Pastoral Care & Liaison Support in all Regions
- NZQA National Certificates via EIT in Primary Industries (level 2 & 3), Pre-Employment Skills (level 3 & Certificate in Agriculture - Food & Fibre (level 3)
- Weekly Sponsorship allowance
- Essential Farm Skills Programme

PURCHASER: **PRICE:**

The Piopio Volunteer Fire Brigade,

Established in 1958, is made up of 17 volunteer brigade members, of which are self employed or employed locally and are committed to serving our community at their time of need, responding to incidents at any time, day or night.

Their tireless efforts, whether at training or on the incident ground are put in for the good of the people they work with, live with or simply the general public.

As volunteers there are many hours given up to this service and thanks goes out to the self employed members and employers of our team, as well as our family members. Without this understanding and commitment this volunteer service wouldn't exist.

It is with great thanks to the Proffit family, Raupuha Stud for giving us the opportunity and having our name drawn for the donation.

This money will go towards our future training area project which will help ours and other volunteer brigades to train more efficiently and excel in gaining expertise in the field when there are real times of need.

INTRODUCING

YOU'LL NEVER LOOK AT YOUR HEIFERS THE SAME WAY AGAIN!

THE COST OF THE UNKNOWN

SELL

VS.

THE BENEFIT OF KNOWING

SELL

An innovative, multi-breed genomic test providing **predictions for commercial females.**

Predictions provide genetic insights **to help make better replacement selection and breeding decisions.**

FEATURES

3 Economic Indexes

18 GEPDs

Percent Ranks

Parentage

Breed Composition

BENEFITS

Ranks females from highest potential return to lowest using GEPD and economic assumptions specific to New Zealand cattle producers.

Informs indexes and enables specific selection, breeding and marketing decisions that can be tailored to your herd.

Benchmarks females against other commercial animals in the evaluation. Easily identify strengths and weakness of cow herd.

Sire parentage contributes to the accuracy of GEPD, assess sire performance and prevent inbreeding.

Indicates maternal heterosis to inform selection and breeding decisions.
