

MEADOWSLEA ANGUS 8TH ANNUAL FEMALE PRODUCTION SALE

ON-LINE AND ON-FARM
MAY 1ST 2024 – 1PM
www.meadowslea.co.nz

OFFERING:

80 R2yr Stud Angus Heifers
24 R3yr Stud Angus Heifers

20 R4yr Stud Angus Cows
20 10yr old Capital Stock Angus Cows

FERTILITY AND MATERNAL TRAITS the key to profitability in any herd!

Meadowslea stud cows winter on unimproved native tussock blocks without supplements being fed. This challenging environment tests the ability of the pregnant cow to maintain condition through periods of winter feed shortages. It is the energy stored in her rib fat levels that enable her to survive, thrive, and ultimately get back in calf and rebreed each year.

Days to calving is a crucial fertility trait that measures the number of days from when the bull is let into the mob until the cow calves. This identifies cow families that calve early every year. Those earlier calves will always be heavier at weaning, and selecting for short Days to Calving will reduce later born calves and allow higher conception rates in a shorter mating period.

"At Meadowslea we have always had some of the highest rib fat levels in the Angus breed. The importance of these fat levels is now recognised with our cattle now having some of the shortest days to calving EBVs in Australasia."

David Giddings

GOOD FAT COVER AND EASY-DOING ABILITY

Meadowslea stud 18mth in-calf heifers showing good fat coverings and ready to winter on the hill.

Meadowslea cows and calves come down off the hill for weaning.

A cow's condition and her ability to lay down fat in times of surplus, and to draw on that fat as an energy source in times of feed deficit is vitally important. This rib and rump fat is the cheapest and most efficient energy store on the farm, and will determine the ability of the herd to get back in-calf and rebreed early after a hard winter or difficult spring.

All Meadowslea yearling heifers are mated and any dries culled. After calving these heifers are run in mating mobs together with mixed age cows and expected to get back in calf early, rear a good calf off the tussock, and stay in good order. This is a tough ask for a first-calver, but this year that age-group scanned with a terrific 97% back in-calf rate!

A cow going into winter with good fat coverings carries an energy store on her back equivalent to approximately 2 bales of baleage.

The Meadowslea herd has natural rib and rump fat levels amongst the highest in the breed in Australasia – acknowledged as a key trait for fertility in the harsh environment.

Meadowslea Eighth Annual Female Production Sale

ON-LINE AND ON-FARM

State Highway 8, 23 Trotters Road, Fairlie
5km west of Fairlie

ON-LINE BIDDING OPENS

HELMSMAN STYLE AUCTION

Wednesday 1st May - 1.00pm

Sale Format

The sale will be conducted as a Helmsman-style auction, meaning that all lots are for sale simultaneously. This is to allow for the participation of those in attendance, as well as those online. The sale will be hosted on our own **yourbid** platform and accessed through our website www.meadowslea.co.nz. Prior to the sale, all lots will be filmed and available for viewing up until sale day on the Meadowslea website.

The cattle are available for viewing in the paddock anytime

– just call 0272299760 to arrange a time.

Registration for those in attendance will be at the on-farm office, where a copy of the conditions of sale will be posted.

Registration for those online will be through the Meadowslea website, where the conditions of sale will also be available.

Buyers will receive a buyer number as they register which will accompany each bid. Buyers registering online will receive a buyer number in their email which will automatically accompany each bid they place, whether they do so at home on their computer, or through their smart phone while in attendance. Those in attendance may also bid by writing on the supplied bidding cards and handing them in to the auctioneers. All live bids and all lots will be visible at all times, both online and on a big screen on-farm.

Online registration is available NOW and we encourage everyone to visit our website www.meadowslea.co.nz, to register, and then place practice bids on the demonstration lots on the auction page.

The Online Open Day video will be released on our website and on Facebook on Friday 26th April at 7pm. This video will include footage of every bull in the catalogue with expert comments from genetic specialists and will be available for viewing right up until the sale.

Online bidding will be open from 7pm on Friday 26th April until the conclusion of the sale.

On Sale Day, May 1st, the on-farm registration and bidding will open at 11am.

Livestreaming with interactive viewing will commence at 12.30pm with a walk through of all the pens with commentary from the vendors and genetic specialists. Requests to review particular cattle can be made through the comments section of the web-site chat room or by telephone or text to the vendors or stock agents in attendance. This will continue throughout until the conclusion of the sale.

A live screen on the website will show all lots alongside their current prices and the buyer number of the bidder who holds that lot. On-farm attendees will be able to view on a big screen on site. Bids will be displayed on a computer or smart phone screen in the following colours:

A live screen on the website will show all lots alongside their current prices and the buyer number of the bidder who holds that lot. On-farm attendees will be able to view on a big screen on site. Bids will be displayed on a computer or smart phone screen in the following colours

Example:

\$2500 Displayed in Red denotes the Vendor's reserve and indicates there has been no bid

\$3000 Displayed in Blue means an active bid has been received

\$3500 Orange highlight indicates a new Bid has been received within the last 2 minutes on this lot

\$3500 The holder of the leading bid will have the lot number highlighted in green on their computer or their smart phone

The sale will run until 2pm on May 1st. After this time the sale will conclude once there has been a period of at least 2 minutes without a bid being received on any lot. If another bid is placed on any lot during the 2-minute period, then time is extended and bids can be received on all lots for a further 2 minutes. This process will be repeated until a clear 2 minutes passes without any bids on any lot at which time the sale will conclude.

Final Time will be called clearly by the commentary team who will use their discretion to ensure all bidders are satisfied.

All updates will be posted on our website, as will an up-to-date version of this document.

Rebate purchasing Commission. There will be no booking company in attendance and all purchasing companies will be responsible for booking of their own client's purchases.

1. 9% rebate commission on females sold for stud transfer and 6% rebate commission for females sold to commercial herds. This rebate commission is available to all stock firms provided the vendor is advised of the purchaser's intention to buy before the commencement of the on-farm sale, or before the purchaser commences bidding on line.
2. 3% rebate commission paid to the nominated buying company when the vendor has NOT been advised of the purchaser's intention to buy prior to the commencement of the on-farm sale, or before the purchaser commences bidding online.

Disclaimer: The BREEDPLAN Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither AngusNZ nor ABRI oversee or audit the collection of this data.

FOREWORD

Meadowslea Angus Stud was established in 1985 with the purchase of 6 capital stock heifers from the well-known Turihaua stud north of Gisborne. We have steadily expanded ever since to meet strong demand for bulls from the hill-country market we target – our belief is that an animal must first and foremost be suitable for the environment it is run in.

With the lease of a neighbour's property 9 years ago and the recent purchase of Punaroa Downs next door we have been able to continue increasing stud cow numbers and this season have mated 730 stud females.

The demand for our bulls has steadily increased with 170 bulls sold at auction in 2023. Seven years ago, with a confident beef industry and the lease block fully stocked, we held our very successful first annual female auction. We now plan to stabilize at around 500 cows and sell a similar number, and age-group breakdown, every year going forward. The longevity, fertility, constitution, and structural soundness of our female cattle are crucial for us to present the number of females in this catalogue. We have very few dry cows and minimal losses to breakdowns or poor constitution because our cows are the right type to handle their environment.

This means fewer replacements are required and more quality surplus females are available to sell.

At Meadowslea all yearling heifers are mated. The decision around which to sell and keep was made in February with relatively limited information on the young female cattle, since we did not yet know how they will perform in the herd. No doubt many of the young females we are offering will turn out to perform as well as, or better than some we are keeping ourselves! Clients purchasing these females in the past 7 years have been very satisfied with their performance and each year we have had many repeat buyers. We offer these females for sale with complete confidence, and in particular the annual draft cows are true capital stock having done up to 10 years on the hill, survived droughts and snowstorms, without ever being fed supplements. These K cows include the third year of daughters born to our most influential sires F540 and Turihaua Crump, and carry industry leading maternal and fertility traits with tremendous longevity. They also include the second daughters of Goldwyn 017 who is also a trait leader for fertility and has IMF in the top 1% for the breed.

As you read this catalogue it will become clear that the animals that perform the best in our environment are of a similar type – strong rib fat levels drive our programme forward for two reasons. It is strongly linked to fertility, early puberty and the ability to calve early and re-breed early over a lifetime. Secondly, it is the energy store the females use to get through the feed shortages and extended stress periods all too common in this harsh environment. **It is significant that the average rib fat EBV of all females on offer is +2.6 ranking them in the top 15% for the breed. The average for the all-important fertility trait of short-days-to-calving at -5.4 days also ranks the sale females in the top 15% for the breed.** High-growth females do not work well in our hill-country environment and you will see few in the catalogue, as over time they have failed to perform and so have dropped out of the herd.

When selecting cattle for our own breeding programme, the key figure we look at is the Self Replacing Index, which we find works well at identifying cattle that can perform and produce on hill country. We strongly suggest clients buying females – and bulls as well for that matter – do the same, in order to sustain a productive and profitable cow herd. The next most important figures are the Days to Calving – the key measure of cow fertility – and Rib Fat, which identifies the easy doing animals that can thrive in the hill country environment.

After a couple of bumper growth seasons in South Canterbury, the very dry conditions of early 2024 have served as a sharp reminder of the type of animal that thrives in this environment, and that which doesn't. It has been very gratifying to see how well these moderate framed cattle with big rib fats have held their condition and produced cracking calves despite tightly limited feed supplies.

All cattle offered have been scanned in-calf by Aorangi Vets Ltd. All dry cows have always been culled at Meadowslea. We individually mate all stud cows, with one bull per mob initially and change bulls over after approximately 30 days. Each cow or heifer is individually assessed and her mating sire carefully selected to optimise her conformation as well as her EBVs, so as to enhance her progeny's suitability for the hill-country environment.

FOREWORD

In 2023 we had 227 stud heifer calves born. We mated 222 as yearlings in 6 different mobs selected on pedigree, performance, and type. Some mobs were single mated while others had 2 yearlings in the second cycle. **The result was a 97% conception rate for the heifers while the 500 Mixed age cows achieved 98%.** This is a tremendous endorsement of the emphasis we place on the key fertility and maternal traits that are the main drivers for profitability in any beef herd.

We undertake DNA parentage testing for all stud calves and purchasers will need to do the same if they intend to register or generate EBVs on the progeny.

This is the eighth year we have we have offered our stud females to the industry, and almost all sires used are unique in the world to the Meadowslea herd. For stud breeders this is an opportunity to access out-cross bloodlines proven to be highly productive in the hill country, and for commercial clients the option to gain access to genetics that would not normally be available in their herds for 3 more years. From our perspective, the more of these bloodlines that are available in the industry here in NZ, the better the chances are of us being able to source sires that fit our breeding programme; a task that is becoming increasingly difficult with the NZ Angus gene-pool now so heavily influenced by genetics sourced from the USA and Australia. Feedlots drive most of the selection criteria for these imported genetics making them, in our experience, unsuitable for our NZ grass-fed sustainable hill-country production.

We wish you well with your purchases and stand behind these cattle 100%.

Regards,

David Giddings

A Transfer fee of \$100 per female will be added to all animals purchased for stud transfer.

(This is to cover administration and any further gene testing requirements)

EBV tables in this catalogue represent the top ■ 15% and ■ 30% for each trait except where Mature cow weight is shaded it indicates ■ desirable for under 600 Day weight and ■ exceptional for under 400 Day weight.

Comments: We lead off our 2024 Female Sale with a lovely daughter of M564 - the son our record breaking 10-year-old cow G1000 and our legendary home bred sire F540. Dam is a Crump granddaughter and also the grandmother of lot 29. T229 has a nice spread of figures with moderate birth weight, strong growth, plenty of fat, and good fertility. She scanned well for both EMA and IMF. She has lovely easy fleshing, great balance and style with volume and capacity. Quality heifer in-calf to Rainstorme by AI - a top mate!

NEW SALE SYSTEM CELEBRATES ITS 4TH YEAR OF SUCCESS

Yourbid, the online Helmsman auction system developed by Meadowslea Genetics of Fairlie, celebrates its fourth birthday with the stud's upcoming In-Calf Angus Female Sale on May 1st.

The stud holds 7 on-farm sales a year across their sheep and Angus cattle breeding operations, including the annual in-calf sale in early May. In 2020, this date fell within NZ's Level 3 Covid lockdown, during which no crowds or gatherings were permitted, making an outcry auction impossible.

With feed supplies tight and meat processing capacity limited, deferring the sale really wasn't an option either, meaning the only way forward was to hold it online. After looking at the various options available, the Meadowslea team decided to design their own from the ground up.

After running helmsman sales for many years for ram sales and in-lamb ewe sales previously, David and son George Giddings could see how an online helmsman sale would work very well for stud stock. They were able to provide a webdesigning friend with a specific brief, and a week or so later Yourbid came into being. The sale was very strong, with spirited bidding from around New Zealand, despite no buyers being in attendance at all.

Since that first sale in 2020, Meadowslea have run 20 successful sales for their own stock, as well as a number of sales for other stud breeders in NZ and Scotland. The system has proven very popular with stud-stock buyers, giving them the extra time to consider their purchases carefully, and the option of buying in choice order rather than lot number order.

As well as that first female sale, Meadowslea has run 2 bull sales, an online semen sale, and 3 ram sales on Yourbid. Yourbid has been used very successfully for studstock sales in Scotland, and the Giddings family have received enquiry from breeders keen to use it from around New Zealand as well as in Australia, France, the US and as far afield as Romania. 3 other ram breeding operations have used it in New Zealand this summer, with a number of bull sales confirmed for the upcoming season and many more interested in switching to it over the next few years.

Online helmsman-style auction

Yourbid works as a Helmsman-style auction - meaning all lots are offered for sale simultaneously.

Other online livestock sales platforms in New Zealand use the traditional sequential auction model, whereby each lot is sold one at a time, one after the other. Yourbid uses the "Helmsman" style of auction. This means that all the lots on the sale are open for bidding at the same time, which is helpful for both buyers and sellers, particularly when conducted online. Bidding is also kept open over a period of several days, rather than the minute or so per lot of a conventional auction.

A key difference of this platform compared to any other the developers have seen is the bidding screen which shows the current prices of all lots simultaneously. Reserve prices are shown in red for a start, this changes to blue once the first bid is received, and the buyer number of the current leading bidder is displayed. New bids are highlighted in orange for a minute. Buyers who are logged in on their own device see the lots they hold highlighted in green. This gives an instant overview of the auction so anyone can see on which lots the activity and interest is, making it easy to establish their relative market values.

All online models have some level of time delay between when events happen on-site and when they are seen by remote buyers. For a traditional sequential auction a delay of 15-20 seconds can be very significant, when each animal might only be in the ring for 90 seconds or so. By keeping the entire auction open for a longer period of time this problem is mitigated significantly. It also means sales will not be affected significantly by any temporary technological glitches.

Giving buyers time

Selecting seedstock is a major decision for sheep and beef farmers, and one which will have ramifications on their operations for years to come. People need time to gather and process information to make decisions. This is even more important when buying remotely, when information gathering is more difficult and takes time – meaning remote buyers are significantly disadvantaged at an online sequential auction. The Yourbid system gives buyers this extra time, and

by integrating the bidding on the website alongside the online catalogue, videos of each lot and a live commentary, this information is readily available to buyers. Rather than turning up on a given day and viewing all the animals in that tight time-frame, buyers can go through the catalogue, view the videos, make selections, and bid at their leisure from home over the period of several days the sale is open.

Bidding order of preference

Another advantage of a Helmsman-style auction is that it allows buyers to bid on stock in the order of their preference, rather than the catalogue order. For instance, as a buyer you might be interested in lot 8 and lot 12. At a traditional auction, lot 8 comes into the ring and isn't selling for too much, however lot 12 is your first preference so you decide to wait for that animal to come into the ring. Lot 12 comes in, sells for too much money, and you can't go back and bid on lot 8 because that animal is sold. Under the Helmsman system buyers can chop and change throughout the bidding. Meadowslea have analysed the bidding data for the sales they have run already, and it is obvious that a lot of buyers will bid on a certain lot to a particular level, then change to another lot, then perhaps go back to the first, or move onto a third animal they like. Some buyers bid on as many as 8 different animals to get the one they wanted – in a conventional auction they would have missed out completely or ended up with one that wasn't in their top-10 at all. By running the auction over a longer period, those who missed out on their first choice were able to go back through the videos and catalogue (or back through the pens for those who were actually onsite) and pick another animal they were satisfied with.

Integrating on-farm and online bidding

Integration of on-farm and on-line bids is crucial to the success of a platform like this. This system works by having large TVs on-farm displaying the bidding screen. Buyers on-site can bid through their smart phones, and those bids are displayed in real time. Some buyers will still prefer to attend on-farm and bid using pieces of paper as per a traditional Helmsman sale – they write their buyer number, their lot number, and the bid price on a piece of paper and hand it in – they are able to enter this directly into the online system so it shows up on-screen in real-time as well.

Engaging with potential buyers

By providing a live-chat on the platform, potential buyers are able to ask questions, request another closer view or more information about a particular lot, and even send through jokes and one-liners. Online videos and the livestreamed commentary are produced through Facebook Live. All this makes for a much more engaging and entertaining environment for the buyers, compared to what many feel are the sterile and austere atmospheres of some of the other established online platforms.

Yourbid invite enquiry from breeders, agents and commercial farmers interested in using the platform, and envisage it becoming an independent platform able to be used by all industry players.

All enquiries to george@yourbid.org or call **David 027 2299760**

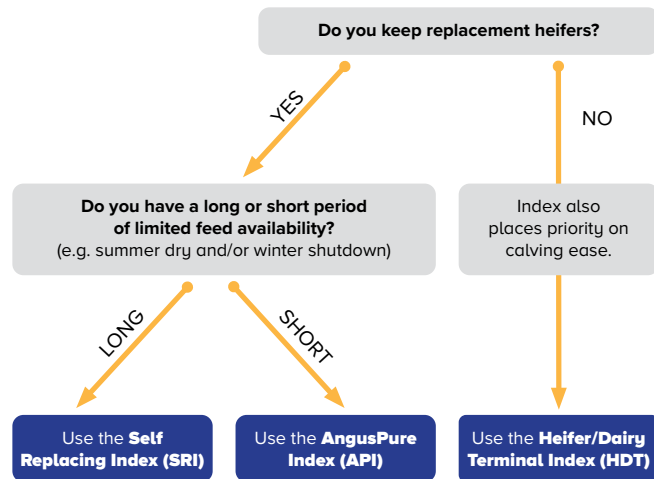

ANGUS NZ EBV's Explained

TransTasman Angus Cattle Evaluation (TACE) EBVs and selection indexes remove the effects of non-genetic factors (e.g. feeding regimes, animal age) from what is seen and measured to provide the best measure of an animal's genetic merit. BREEDPLAN information should always be used in conjunction with other selection criteria, including visual assessment.

A BEST PRACTICE GUIDE TO SELECTING YOUR NEXT NEW ZEALAND ANGUS SIRE

A TACE Guide to Animal Selection allows you to select the best genetics for your herd in four easy steps:

Which New Zealand Angus Selection Index should you use?

1. Identify the **Angus New Zealand selection** index of most relevance to you.
2. **Rank animals** using the chosen selection index.
3. Consider the individual EBVs of importance.
4. Consider other traits of importance (e.g. visual assessment).

The majority of these steps can be undertaken online, allowing you to generate a shortlist of bulls for potential purchase ahead of sale day. The searchable version of this catalogue can be found online here www.angusnz.com.

TRANSTASMAN ANGUS CATTLE EVALUATION

A TACE Guide to Interpreting EBVs outlines how to assess and compare the genetic merit of animals. Please note that only EBVs from the same TACE analysis can be directly compared. The New Zealand Angus Association publishes the following TACE EBVs:

Calving Ease Direct (%): Higher (or more positive) CED_{ir} EBVs indicate that two year old heifers will have less difficulty when calving this sire's progeny.

Calving Ease Daughters (%): Higher (or more positive) CED_{tr} EBVs indicate easier calving of this sire's daughters at two years of age.

Gestation Length (days): Bulls with lower (or more negative) GL EBVs are expected to produce progeny with shorter gestation lengths. Such progeny are also expected to be easier calving.

Birth Weight (kg): Bulls with lower, less positive BW_t EBVs are expected to produce progeny that are lighter at birth, with an associated lower risk of calving difficulty. This EBV is particularly important when selecting sires where there is an increased risk of calving difficulty (e.g. heifers, cross-breeding).

200, 400 & 600 Day Weight EBVs (kg): Bulls with larger (or more positive) Weight EBVs are expected to produce progeny that grow faster to 200, 400 & 600 days of age, respectively. The Weight EBV of particular importance will depend on the target market e.g. vealer (200 D), yearling (400 D) or heavy steer (600 D).

Mature Cow Weight (kg): Bulls with larger (or more positive) MCW EBVs are expected to produce daughters with higher mature cow weights and increased feed requirements. More moderate MCW EBVs are generally more favourable in self replacing or maternal production systems.

Milk (kg): Bulls with higher (or more positive) Milk EBVs are expected to produce daughters with more maternal ability leading to higher 200 day weights in their progeny. Selection for moderate Milk EBVs may be preferable in harsher environments as cows with higher Milk EBVs can have impaired fertility and decreased survival under such conditions.

Scrotal Size (cm): Bulls with larger (or more positive) SS EBVs indicate better semen quality and quantity. Daughters are expected to be more fertile and reach puberty at an earlier age.

Days to Calving (days): Bulls with lower (or more negative) DTC EBVs are expected to produce daughters that are more fertile and have a shorter interval from bull-in date to calving.

Carcase Weight (kg): Bulls with larger (or more positive) CW_t EBVs are expected to produce progeny with heavier carcasse weights.

Eye Muscle Area (sq. cm): Bulls with a higher (or more positive) EMA EBV are expected to produce progeny with better muscling.

Rib and Rump Fat EBVs (mm): Bulls with higher (or more positive) Rib & Rump Fat EBVs are expected to produce fatter progeny, relative to carcasse weight. The desire for more or less fat will depend on the finishing ability of your animals.

Retail Beef Yield (%): Bulls with higher (or more positive) RBY EBVs are expected to produce progeny with higher yielding carcasses.

Intramuscular Fat (%): Bulls with higher (or more positive) IMF EBVs are expected to produce progeny with more marbling and better grading scores (e.g. MSA).

Docility (%): Bulls with higher (or more positive) DOC EBVs are expected to produce more progeny with acceptable temperament.

For more information on **using and understanding TACE EBVs & information**, including the BREEDPLAN Guides, scan the QR code.

SELECTION INDEXES

The New Zealand Angus Association currently reports three different selection indexes. These are the:

- Self Replacing Index
- AngusPure Index
- Heifer/Dairy Terminal Index

Each selection index is reported in units of net profitability per cow mated (\$), and relates to a commercial herd using Angus bulls. Each selection index is focused on efficient beef production, including maternal traits where appropriate. Scan the QR Code for more detail.

Comments: Recognised as one of NZ's most influential and long-lasting senior sires of recent times. He has over 450 progeny in 21 herds in both NZ and Australia and is a trait leader for the important fertility EBV of short days to caving at -9.8 days. Traditional NZ Angus hill country type with proven industry leading fertility. His grandson Meadowslea Mountain Man was the highest selling 2-year-old bull in NZ in 2020 and sons and grandsons have sold for up to \$85,000 at studs across the country. His daughters are the top breeding females in our herd and are proving exceptionally fertile and productive in our hill country, resulting in him now achieving a self-replacing index in the top 10% for the breed. He has a major influence in this sale with 42 daughters and granddaughters on offer including his 10-year-old daughters which are a feature of the sale.

Comments: F540 continues to have a huge influence on our herd with exceptional longevity to 13 years old. He has been used successfully in many breeding programmes with over 300 progeny in 11 herds in NZ and Australia. Deep, thick, easy-doing sire with exceptional production figures for hill country. He has strong maternal and fertility traits and is a trait leader for both short gestation and milk, while his short days-to-calving, rib and rump fats, and IMF all feature in the top 10% for the breed. His daughters are outstanding in the herd weaning thumping calves while maintaining their condition all year round, a real testament to his easy doing traits. He features strongly in this catalogue with 32 daughters and granddaughters offered, including the top pen of outstanding 10-year cows on offer

Comments: The top Goldwyn bull of his year and purchased for \$13,000. A son of the widely used Te Mania Infinity and out of the top price cow at the Goldwyn stud dispersal sale. He is passing on very strong fertility traits and this is reflected in his daughters' conception dates, resulting in him becoming a trait leader for short days-to-calving at -9.1 days. He has several good daughters and numerous granddaughters in the sale all exhibiting his exceptional IMF, which at +4.4 ranks him in the top 1% for the breed.

---------	----	--------	----	--------	-------------------------	--------

Comments: There is no doubt why we named this fellow Meat Machine, and he has become an all-time favourite sire. We now have over 180 progeny, and he is having a huge impact in the herd. He leaves terrific thickness and depth with great hindquarters. He passes on the easy-doing ability we value so strongly, and this shows in his exceptional rib and rump fats which are almost off the scale for the breed. He has strong calving ease at +7.2 with super low birthweight in an early maturing, moderate frame. We believe he is the true Angus hill-country type and this is endorsed with an SRI index in the top 5% for the breed. He features strongly in the catalogue with plenty of daughters and granddaughters on offer.

Comments: This son of G914 is out of one of the top 10-year-old Turihaua Crump cows sold in the 2022 sale and is bred to be thick as a brick. He has maternal and fertility traits that are exceptional, with calving ease, low birthweight, and short days-to-calving in the top 10% for the breed. Meanwhile his rib and rump fat EBVs are off the scale. His progeny have always scanned well for EMA and are all of the moderate efficient type resulting in him generating a SRI index in the top 2% for the breed. We believe any high country farmer - and his bank manager - would love to have a herd of cows from this bloodline! He is the sire of some classy females on offer and also has many granddaughters throughout the catalogue.

Comments: Retained in the stud in 2018, M564 is a son of F540 and out of our record-breaking cow G1000, who was sold to Australia in our 2021 female sale for \$16,000. She was sired by the high-performing Glanworth 08-16, and she scanned with the biggest EMA of her year group. We selected M564 to use as a yearling after he had scanned with the biggest EMA ever recorded in the stud and he is consistently passing this trait on to over 100 progeny scanned in 10 stud herds throughout NZ. His data set is very impressive for profitable efficient beef production in NZ hill-country. He has calving ease, short gestation with moderate birthweight followed by strong early growth to 400 day levelling off to give the moderate efficient cow size needed in our environment. His fertility traits are equally as impressive with both scrotal and days to calving ranking in the top 10% for the breed. His exceptional carcass traits are hard to find in traditional NZ bred bulls with both EMA and IMF ranking in the top 10% while his easy doing fats sit in the top 1%. All this data combines to generate a SRI index in the top 2% for the breed in NZ. M564 has some top selected young daughters on offer as well as being used as an AI sire over some of the very best females in the catalogue.

Comments: Panther was purchased at the record breaking Turiroa sale in 2020 and named for his superbly balanced walking ability. He has a top pedigree, being out of a top-performing cow at Turiroa Stud, from their embryo transplant programme. Her sire is our own Turihaua Crump, and she is a full sister to Turiroa Maverick who bred so well at Rangatira Stud and featured strongly in their dispersal sales. Panther is deep, thick, and square with an exceptional hindquarter and terrific easy doing fats in a moderate frame. His progeny display wonderful easy fleshing with terrific depth of body and strong growth. He has daughters on offer and was mated to top females throughout the catalogue.

Comments: P565 was our top keeper bull in 2020. He was a standout as a calf, and with his exceptional depth and thickness he was our first choice to mate over stud heifers as a yearling. He has a top pedigree being a son of the well-known Taimate Lazarus, and out of a top 10-year-old cow G943 who was sold in our 2021 Female Sale to Piko-Burn Angus. P565 has good calving ease, short gestation with moderate birth weight and very good scrotal. The first of his sons were very impressive in our 2022 and 2023 bull sales including lot 1 in 2022 sold to Red Oak stud for \$19,500. He has some very impressive 2-year and 3-year daughters on offer and has been mated to some very good cows following up the AI programme.

Comments: We retained P700 in 2020 after using him over stud heifers as a yearling. He was one of many outstanding sons of L226 and we selected him for his strong fertility traits and compact moderate frame packed full of meat. He excels in all the traits we value in the hill country with calving ease, low birth weight and efficient moderate cow size. He has exceptional fertility traits with scrotal size, short days to calving, and rib and rump fats all in the top 10% for the breed. The first of his progeny scanned terrifically well for IMF ranking him in the top 5% for the breed. His mother is a lovely moderate framed 11-year-old cow offered at lot 105 in our 2022 sale. The first of his sons were the feature of our 2023 bull sale including the top price to Mt Possession Angus and another to Glen R Angus, all with exceptional IMF figures. He has 2-year daughters on offer and is also a mating sire

Comments: P674 was sold in our 2020 bull sale for \$18,000 to Dovedale. His full brother N141 was the top price bull in the 2019 sale sold to Waimara Angus at \$22,000. We retained semen in P674 recognising that he was double-bred to Braveheart and had inherited his very strong EMA. With Meat Machine as the sire of the dam he is bred to be thick, deep, and square and he is certainly passing this on to all his progeny. He has a great spread of figures and is in that sweet spot we like for moderate frame, fertile, easy doing cattle in hill country and that is recognised with a self-replacing index in the top 10% for the breed. He has been used as an AI sire over selected sale cows as well as having some exceptional young daughters on offer. He also has two outstanding sons who were used as mating sires and will be a real feature of our 2-year sale team if we decide to sell them.

Comments: We purchased this Taimate Lazarus son as a yearling for \$9,000 to use in our heifer mating programme. We selected him for his depth of body, strong hindquarter, and clean shoulders, and were so impressed with him that he has been used to mate top adult cows as well. His figures fit well with our emphasis on maternal and fertility traits and he ranks in the top 10% of the breed for calving ease, low birthweight, short days to calving, and moderate cow size. His carcass data shows strong muscle, good rib and rump fats as well as IMF. This combination of efficient performance figures generates a Self-Replacing Index at the very top of the breed at +\$180. He has some impressive R2-year and R3-year heifers in the catalogue. “

Comments: Q178 was our top keeper in 2021 and we rate him as one of the best bulls we have ever bred. He is a son of Rangatira 16209 who bred an outstanding line of bulls for us in the 2021 Bull Sale, with sons selling to \$32,000. He displays exceptional depth of body, with a powerful head, bone, and very good feet. He has a superb hindquarter and wonderful temperament. He has a good balance of figures for hill-country with strong fertility, recording scrotal and short days to calving figures in the top 10% for the breed. This bull has attracted much interest with strong semen sales to some of the leading studs in NZ as well as sales to Australia and USA. He has some top young daughters on offer in this catalogue and features as a mating sire.

Meadowslea Q178 - outstanding herd sire retained in the stud in 2021.

Comments: Q250 was also retained in 2021. He is a son of our high-performing sire M564 and a grandson of our record price cow G1000 who was sold in our 2021 Female Sale to Australia. Q250 is a lovely, well-balanced, moderate-framed bull who ticks a lot of boxes for hill country production. He has calving ease with low birthweight and moderate efficient mature cow size. His maternal and fertility traits are very strong with his scrotal size, short days to calving, and rib fat all ranking in the top 10% for the breed. He has inherited the good EMA coming through from his record-priced grandmother G1000 and has IMF in the top 10% for the breed. All this performance gives him a SRI index in the top 5% for the breed. A very sound bull with a great pedigree behind him including the graet old cow A330 the grandam of Sudeley Viking. He has some top daughters on offer and was used as a mating sire.

Comments: We purchased Rebel at the final Rangatira Bull Sale in 2021 for \$35,000. For us he was the standout bull in the catalogue, both for his pedigree and his moderate, sound, deep body type. His sire is the high performing Turiroa Maverick, who is a son of our own Turihaua Crump. His dam has bred exceptionally well, with a full brother to Rebel selling in the 2020 Rangatira bull sale for \$35,000. Rebel has all the quality and soundness attributes that the Rangatira herd was known for, and the first of his progeny coming through as R2yr olds look very impressive with some of the stand-out daughters on offer.

Comments: Purchased at the 2021 Turihaua bull sale, Tornado is a lovely moderate framed, wonderfully sound, traditional Turihaua type of bull. He has exceptional structural soundness, and wonderful feet and legs to give longevity of production. He exhibits strong muscle with a deep flank and very good hindquarter. We see a lot of similarity to Turihaua Crump in this bull and very much like the look of the first of his 2-year-old sons coming forward for sale. He has the first of his 2-year-old daughters for sale and has been mated to some good cows throughout the sale.

Comments: Purchased at the 2021 Turihaua Bull sale, Jupiter impressed us with his superb structural soundness, scoring almost perfect 5s in the Beefclass scoring system. He is a deep bodied, moderate framed bull with exceptional muscle, and this is supported with an EMA figure of +8.1 ranking him in the top 5% for NZ. He has the important fertility trait of short days to calving ranking in the top 2% for the breed and the easy doing fats we rate so highly in the hill-country. All this combined with a very moderate mature cow weight generates a SRI index in the top 1% for the breed. The first of his R2-year progeny are outstanding with 5 sons used as yearlings that will be a real feature of our 2024 bull sale. He has R2-year daughters on offer and is mated to a selection of top cows in the catalogue.

Comments: Purchased in May 2022 for \$81,000, Rainstorme is the most exciting sire we have used at Meadowslea. He ticks all the boxes for efficient beef production on hill country and has generated widespread interest from stud and commercial breeders in both NZ and Australia, with semen and embryo sales of over \$90,000 recorded to date. Rainstorme has the unusual combination of data that is backed up by viewing the bull himself. His massive EMA is visible in his exceptional loin and his easy doing ability with his strong fats is very evident. His wonderful smooth shoulder confirms his calving ease trait leader status and his massive scrotal is also industry leading. The first of his calves weaned at outstanding weights and have displayed his exceptional carcass shape from a very early age. We have selected some top heifers and cows mated to Rainstorme as feature lots in the sale.

Comments: R818 was the outstanding Meat Machine son from the 2020 calf drop and was sold in our 2022 bull sale to Jade Park Angus in Australia for \$23,500. The bull has remained at Meadowslea and we are very fortunate to be able to use him. He has developed tremendously, and his depth and thickness have impressed all who have seen him. R818 has strong caving ease and low birthweight coming from the Meat Machine bloodline. He displays a very deep, wide hindquarter and a wonderful clean shoulder with great balance and outlook. R818 has the exceptional easy doing ability we value so strongly in the hill-country, with good rib and rump fats and the volume and capacity to handle the hardest conditions. He is a mating sire throughout the catalogue

Comments: R646 was retained in 2022 after being used as a yearling. His sire Meadowslea M429 was sold to Red Oak stud for \$18,000 and was a son of the \$100,000 bull Rangatira 13-38. The dam of M429 is the great old cow G922 who is also the dam of Meadowslea N166 and was sold to Ballanee Angus, Australia for \$9,300. The dam of R646 is a great cow by KayJay Freedom I36 going back to Braveheart. R646 has tremendous volume and thickness with strong growth and terrific scrotal size. He has an exceptional muscle pattern and superb width across the loin and hind-quarter muscle with a wonderful easy doing ability. He has some outstanding calves on the ground and will be a sire to look for in the future. Used as a mating sire in this catalogue.

Comments: We purchased this bull at the 2020 Rockley sale as a yearling to mate stud heifers. We were attracted first to his fertility traits, which ranked him as the highest fertility bull ever born in NZ for the combination of scrotal size and short days to calving. His pedigree is very interesting with some of the great pure NZ bulls in the background including Pinebank 41 and Hingaia 469, as well as Kaharau Heritage 421. Rockley 41 has plenty of calving ease and is a trait leader for short gestation and scrotal size. He has low birthweight, followed by strong early growth in a moderate frame. His carcass data is also impressive with good muscle, strong fats, and good IMF in the top 5% for the breed. All this exceptional data combines to generate a very good SRI index in the top 2% for the breed. He has some top 2-year old daughters on offer and was used to follow up the AI programme.

Comments: We purchased this bull for \$20,000 in 2023 after searching for the best Sudeley Viking son to suit our programme. Viking was sold for \$60,000 to Earnsleugh and his pedigree attracted us with the sire of the dam Meadowslea C844 going back to one of our greatest ever breeding cows A330. She shows up in the pedigree of many of our stud bulls and all her descendants have exceptional IMF data. Bjorn has certainly inherited marbling from both sides of the pedigree with Reality in the background as well giving him an IMF figure in the top 1% for the breed in NZ. We used him to mate some of the top heifers on offer to emphasise IMF and utilise his clean shoulders, moderate birth weight and good calving ease attributes. An impressive stylish bull with easy doing fats and a strong pedigree.

Comments: S160 was retained in 2023 after being used as a yearling to mate heifers. His sire Q223 was an outstanding son of Rangatira 16-209 who we used as a yearling before he was sold to Riverlands J Angus. Q223 bred exceptionally well with stud bulls sold in our 2023 sale to Turiroa and Tarangower Angus. His dam is a nice moderate 2-year heifer by Goldwyn 17 who scanned with the best IMF of her year group. S160 is deep thick and square with terrific feet and bone. He is a great heifer mating sire with calving ease, low birth weight and very strong fertility traits as well as terrific fats and good IMF. We really rate this bull with his wonderful soundness, and he has been mated to some of the top 2-year heifers on offer.

Comments: We lead off our 2024 Female Sale with a lovely daughter of M564 - the son our record breaking 10-year-old cow G1000 and our legendary home bred sire F540. Dam is a Crump granddaughter and also the grandmother of lot 29. T229 has a nice spread of figures with moderate birth weight, strong growth, plenty of fat, and good fertility. She scanned well for both EMA and IMF. She has lovely easy fleshing, great balance and style with volume and capacity. Quality heifer in-calf to Rainstorme by AI - a top mate!

HEIFER / DAIRY TERMINAL INDEX	+\$103

Comments: A top quality heifer again, this time by Rockley R41. Terrific fertility traits in this bloodline. T139 ranks in the top 1% of the Angus breed for both scrotal and short days to calving, she has calving ease, short gestation, and low birth weight. Her fats rank in the top 5% and her IMF is strong too, generating a self-replacing index in the top 10% for the breed. Combine her figures with the mating sire Rainstorme and it will be a terrific data set. Great topline, wonderful easy fleshing, and a very well-balanced type.

Comments: A Beautifully balanced heifer with a lovely topline. Sired by P674 who is double bred to Braveheart and has been breeding exceptionally well. Dam is a great 10-year-old cow going back to F540 who produced a cracking bull at lot 27 in the 2022 bull sale. T216 is deep, thick, and meaty with quality and style about her. She has calving ease and moderate birth weight with the efficient moderate frame size we like in the hill country. Another terrific mate for Rainstorme.

58%	33%	57%	55%	60%	60%	55%	57%	

Comments: Here is another quality heifer by Rockley R41 exhibiting the same exceptional fertility traits with short gestation, short days to calving and scrotal in the top 5% for the breed, as well as a nice moderate mature cow weight, giving a self-replacing index in the top 10%. Out of cow going back to Braveheart. Grand dam is also the mother of lot 49. A Nice easy-fleshing, deep-bodied type once again that should prove to be a great mate to Rainstorme.

Comments: A daughter of M564 again with a good pedigree going back to the Goldwyn 017 bull ensuring plenty of IMF. Dam J428 was sold in the sale last year to Alan Fielding, and grand-dam G828 made the sale in 2021 so amazing longevity! Lovely balance and style about her with tremendous width across the loin and depth of body. Figures are exceptional with days to calving and fats in the top 5%, as well as low birthweight and strong IMF. Check out her index!! Mated to Sudeley Bjorn to keep that IMF going.

Comments: Another lovely clean shouldered, upstanding type. This time by the high performance yearling R623 and going back to Turihaua Crump. Good performance here with another top index in the best 10%! Low birthweight again with strong scrotal and exceptional short days to calving indicating fertility. Big fats there too. Should be a great mate to the new Sudeley bull with his exceptional IMF data.

Comments: First daughter of the \$35,000 Rangatira Rebel to be offered. Well fleshed with clean shoulders, shows all the quality and style of her father with strong growth and tremendous upstanding outlook. Scanned with one of the top actual eye muscle areas. Mother is also the dam of lot 82, while the grand dam was a great old cow who bred a stud bull sold to Turihaua Angus and lasted the full 10 years in our herd. In-calf by AI to M564, with his terrific data set.

67%	54%	65%	64%	67%	67%	64%	64%	

Comments: A direct daughter of old F540 himself, out of a great old cow going back to old Goldwyn who bred a bull we used as a yearling and sold at lot 19 in June 2023 to Strathavon. She also bred a top bull sold to Greg Hand and an R4-year cow in this sale at lot 103. Plenty of growth here with the short gestation and strong fertility figures we would expect of those bloodlines. Days to calving is in the top 5%, her fats are strong, and IMF is very impressive. A very exciting AI mate to Rainstorme.

60%	48%	62%	62%	66%	65%	61%	61%	

Comments: Nice upstanding heifer to lead this next pen of bigger framed cattle. By K703 out of a cow by Goldwyn 017 so we expect IMF and her actual scan was the top in the mob. Thick, deep, easy doing type with strong fertility traits - days to calving in the top 5%, and exceptionally easy doing with rib fat in the top 1% of the Angus breed. This together with moderate cow weight and strong scrotal size wins her an index of 161! Should be a very outstanding mate to the high IMF Sudeley Bjorn.

Comments: To lead off this pen of moderate framed, meaty cattle, we have this lovely P700 daughter with a very strong coat. Extremely well bred, her mother Q454 was a star of the 2023 sale being sold to Jade Park Angus in Australia for an embryo programme. Q454's mother H131 was sold to Sam Mann in the 2022 sale. Quality, balance, and style with good IMF figures as her bloodline is known for along with a spread of calving ease, low birthweight, scrotal, days to calving at fats. This should be an exceptional mate for Sudeley Bjorn who has one of the top IMF figures around.

Comments: First daughter to be offered by Turihaua Tornado. She shows all the balance, thickness, and depth he is consistently leaving. Goes back to Braveheart and Meat Machine on the dam side as is apparent in her great hindquarter. Strong fat and IMF figures again with a top actual scan. Mated to the M564/Q250 yearlings. Top quality heifer with really strong head, bone, and feet. Note some white.

Comments: First of the Q178 daughters, showing all the depth and thickness he leaves. Out of an L226 cow which seems to be a very good cross indeed. Quality, moderate framed heifer with a strong hindquarter, depth, and thickness. Fertility traits of days to calving and scrotal size are both in the top 25% of the breed. Mated by AI to S341, our top price bull in 2023.

Comments: Another impressive daughter of Rangatira Rebel. The dam side of the pedigree features the great cow E350 who was sold to Piko Burn Angus at \$5,000 in one of our earliest annual sales. Grand-dam M581 is also the mother of lot 24 in the same pen! Lovely clean shouldered, upstanding type with depth of body and real capacity about her. Short gestation, good solid growth figures, and good milk. In-calf to one of the AI follow-up sires.

Comments: First daughter offered this year by Turiroa Panther, and out of a good cow by Rangatira 13-38, the \$100,000 bull. Dam is breeding well including lot 7 in the 2023 Bull Sale. Strong growth, lovely easy doing type with balance and style. Terrific length and top to her with good calving ease and rib fat in the top 10% of the breed. Another mated by AI to our 2023 sale topper S341.

Comments: A daughter of old Meat Machine himself, being out of a top breeding F540 daughter who bred a \$15,000 bull to Matt McKenzie and a yearling used in the stud. She is also the grandmother of lot 21 in this same pen, and her mother is also the mother of lot 59. This is a stylish heifer with balance, terrific calving ease and low birthweight. An exceptional easy doing type with incredible fats, moderate mature cow weight, and a strong self-replacing index. In-calf to one of the good AI follow-up bulls.

Comments: Another of these impressive M564 daughters leads in this pen of moderate framed, strong coated heifers. Mother was sold as a 10-year-old in the 2023 sale. Nice low birthweight, deep bodied, easy doing type. Great width across the top with volume and capacity. Rib fat is in the top 5%, she has good IMF and an impressive index as a result. Should be a good mate to S160. Note some white.

60%	38%	60%	59%	63%	62%	58%	58%	

Comments: Plenty of capacity to this very well bred P700 daughter, out of a top cow by K904 who bred P593, sold to Cricklewood Stud for \$32,000 as well as another top bull sold to Greg Hand. Grand-dam K945 is an old cow in this sale at lot 129. Good growth figures once again with great balance and style and a strong coat. Days to calving, fats, and scrotal indicate fertility. Lovely width across the top and clean through the shoulders. This could be a really top mate to Rainstorme.

Comments: Plenty of growth here with EBVs in the top 25% of the breed. Out of a cow by M429, the stud bull sold to Red Oak in 2018 who was himself a son of the \$100,000 Rangatira 13-38. A good type of cow, nicely balanced with some stretch about her. Deep and wide with good scrotal size. Mated to the M564 / Q250 yearlings.

Comments: Nice tidy daughter of Rockley with very strong fertility and maternal traits, at the very top of the breed. Days to calving and short gestation are in the best 5% and scrotal size the top 1%. Grandmother L293 was the mother of Q223, who was sold for stud to Riverlands J Angus and bred our keeper S160 and 2 other stud bulls last year. Deep, thick, and square with strong index values again. Mated to the M564/Q250 bloodline.

Comments: Here is a cracking heifer by Rockley, out of a cow going back to Braveheart and Crump. Was a 2-year heifer's calf and her mother appears in this sale at lot 106. Terrific balance and outlook, wonderful hindquarter, thick deep and square. Some of the best fertility data you would ever find! Scrotal size is in the top 1%, days to calving the top 5% and her short gestation and EMA figures are strong too, hence that outstanding self-replacing index! Should be a great mate for the high marbling Sudeley Bjorn.

The Meadowslea hill-country type

Visual appraisal is still very important for selecting cattle to perform in hill - country

MASCULINE TRAITS - A strong head and jaw and thick neck indicate high levels of libido, testosterone and reproduction efficiency

NECK LENGTH - A thicker necked animal matures and reaches puberty earlier and has more libido

A longer neck indicates a higher maintenance animal that is slower to reach puberty and re-breed

HEART GIRTH - Large heart girth is an indicator of vigor and easy keeping ability

Small heart girth animals are more susceptible to stress, are higher maintenance and do not perform well on tussock

RIB FAT - Strong rib fat covers are the essential energy store for adverse conditions.

They indicate easy-doing and finishing ability and are directly related to increased fertility in both heifers and cows.

STRUCTURAL SOUNDNESS, FEET AND BONE - High country cattle cover large distances over rugged terrain so a strong skeleton is essential

HIDE - a good thick skin and coat is essential in the cold harsh environment

FLANK - Deep flanked animals are easier keeping, have more meat in the rump and have more maternal and reproductive efficiency

Higher flanked animals tend to be flighty, are higher maintenance and take longer to finish on grass

SCROTAL SIZE - Larger scrotal size at 12 months indicates daughters will reach puberty earlier, be more fertile, and re-breed early every year.

BRED FOR THE HILL COUNTRY

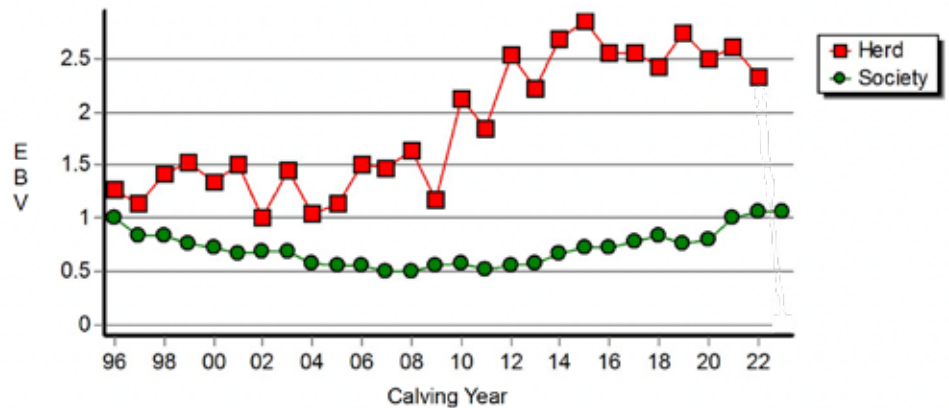

The development of the Meadowslea hill - country type has been the result of 25 years of selecting animals that perform the best in our hash hill country environment. Cows that can winter easily on the hill without supplements, stay in good order, calve easily and get back in calf early every year for 10 years has been the focus of our breeding programme. By putting pressure on cows to winter on native hill blocks it quickly became apparent that some animals could manage well in this environment and would easily get back in calf the next year, while those that struggled would be too light going to the bull, and either calve later each year, or come through dry.

Those that were dry or were not holding their condition well enough were removed from the stud herd, while the "easy-doing" types thrived and passed their genetics on to the next generation. It was clear that it was the cows with good fat covers going in to the winter that were consistently performing the best in our environment.

Ultrasound scanning is performed on all yearling bulls in early spring, and on the heifers in the autumn. For us, the most important data is the rib and rump fat cover measurement - we have found these strongly correlate with those easy doing characteristics, and we now put a lot of emphasis on this when selecting bulls to use and heifers to retain. This is reflected in Meadowslea having some of the highest fat EBVs on the Trans Tasman Angus Cattle Evaluation.

These great positive fat EBVs in the Meadowslea herd have come about simply by selecting animals that suit the hill country environment.

Carcase Rib Fat (mm)

Graph showing improvement in fat EBVs at Meadowslea while running the herd on hill country, compared with Australasian average. From TransTasman Angus Cattle Evaluation, April 2023.

■ Meadowslea herd
● Australasian herd average

The average rib fat EBV of the females in this catalogue ranks in the top 15% for the breed in bred in NZ as does their Short Days to Calving EBV.

61%	43%	60%	60%	64%	64%	59%	59%	

Comments: Another deep solid type, this time by M564 and going back to Reality on the dam side! Scanned with tremendous fats - in the top 1% - and one of the highest actual IMFs in the entire herd. Low birthweight and good fertility with short days to calving. A top index as you would expect! Should be a terrific mate to Sudeley to double up the IMF.

Comments: Very smart heifer here with a great coat, depth, and thickness. Well bred by the \$32,000 Woodbank 7017 and out of a Crump cow, so we expect great fertility traits which she has in spades. Short gestation, and days to calving in the top 5%. Medium birthweight, strong growth, and easy doing fats. Very impressive deep square body should be a great mate for S160.

Comments: Here is a well-bred heifer by old F540 himself, out of a young cow by M452 from the Rangatira 13-38 bloodline. Great quality here again and scanned with one of the top EMAs of the year. Short gestation, low birthweight, plenty of milk and days to calving in the best 10%. Rib fat and IMF indicate carcass quality. Deep thick and square with the same great coat once again and a very good hindquarter. A really good mate to the outstanding P674 yearlings. Another quality heifer to have a close look at!

Comments: Lovely upstanding clean shouldered heifer by Rangatira Rebel, out of a cow by Meat Machine who bred a bull sold to Reece Whitelock. Mother is the grandmother of a top heifer at lot 4, while the grandmother made the 2021 sale as a 10-year-old. Nice moderate birthweight followed by good growth and moderate cow weight. Scanned exceptionally well for EMA and has some real scope and scale about her, a lovely easy fleshing, free moving type. In calf to one of the AI follow-up bulls.

Comments: Another very well-balanced heifer, this time a Lazarus granddaughter by P565. Out of an old Crump granddaughter who also bred a full brother S516 we used as a yearling and sold to Peak Hill Station in October 2023. Lovely deep, square, easy-doing type. Wide across the loin, deep in the flank, with nice balance and style about her. In-calf to one of the P674 yearlings. Worth a good look.

Comments: Powerfully built, well-bred heifer here who is a Lazarus granddaughter out of a Crump cow who bred a top heifer sold to Stoneburn Angus last year. Good calving ease and a low birthweight with real thickness and depth of body. Impressive fertility with good scrotal size and a days to calving figure in the top 10%. Nice presence and outlook with a maternal phenotype. In-calf to the Sudeley Bjorn bull.

Comments: Well put-together heifer by Timperlea Quain with great calving ease figures and a low birthweight, which combined with moderate cow weight and short days to calving gives an SRI of 139. Great grandmother was G943, the mother of P565. Nicely balanced type that should be a good mate to the P674 sons.

Comments: Another of these well-made Q250 daughters, out of a good old cow by Kaharau 558 who is also the mother of lot 24 and the great grandmother of lot 21. Very easy doing type with terrific fats in the top 1% of the breed, lovely balance and outlook. Good performance across the page gives her a top index - in the top 10% - with low birthweight and short days to calving. We liked the look of her and AI'd to the P700 son S491, sold to Glen R Angus in 2023.

Comments: A daughter of the Rockley R41 bull, out of a cow by F540 so we know to expect good maternal and fertility traits. Grandmother J534 was sold as an old cow to Jade Park Angus of Victoria, Australia in 2023. Terrific short gestation, days to calving and scrotal size are all right up there in the top 5%! Big fats and impressive IMF as well. Nice upstanding type with an impressive SRI of 147. A good mate to the high marbling Sudeley Bjorn bull.

Comments: Nicely balanced quality heifer here from the M564 bloodline and back to Braveheart on the dam side, with Crump in the pedigree as well. Nice low birthweight, good growth, and those exceptional easy-doing fats showing up. Good fertility with DtC and scrotal both very impressive. Mated to the Sudeley bull this time.

Comments: Here is a daughter of R818, the bull sold to Jade Park Angus in Australia in 2022. Out of a R2-year heifer by old Goldwyn 017. We know to expect good fertility traits with this cross and she has plenty of calving ease, super low birthweight, fats and days to calving in the top 5% of the breed, and strong IMF which all combine for an index 157. Mated to the Q250 / M564 yearlings.

Comments: We lead this final pen of really chunky types with this Lazarus granddaughter by Timperlea Quain. Great set of performance data across the page with good calving ease, very strong early growth, and scanned with one of the biggest EMAs in the year group. Easy doing fats on her as well which all combine to give an index of 148. Thick deep and square with a strong backend, a good hill country type in-calf to S160.

Comments: Feature lot: Terrific heifer to start this feature pen of R3-year heifers. Fantastic pedigree, sired by Rangatira 16209 and out of top F540 10-year-old cow who is in this sale at lot 121! She has bred well including a top bull to Glenquoich Station at \$10,000. Half-sister out of the same cow is in the first pen of R2-years as well! Great volume and capacity, lovely style and outlook with a good spread of figures across the board. Fats, short gestation, days to calving and milk figures are all strong for a top maternal package! A fantastic mate to Rainstorne - has to be a top pick!

Comments: Nicely presented heifer by Q524. Mother M1079 bred a good bull in the 2022 bull sale and is the dam of the top heifer at lot 10, while grandmother H190 produced a bull sold for stud to Turihaua Angus and was herself sold in the 2022 female sale as a 10-year-old. Great length, depth, and capacity. Very clean through the shoulders and has a good spread of figures again with milk, fats, and IMF. The only female offered in-calf by AI to the high-profile Taimate Roy. Weaned one of the top calves in her age-group. Another top pick!

Comments: Another lovely deep-bodied Lazarus granddaughter with strong growth, good fertility, great capacity and real volume about her. Strong head and bone. Figures feature short gestation, strong scrotal size and short days to calving. Mated by AI to P674 which will double up that strength and thickness.

Comments: Sire P700 and sire of dam K703 both leave plenty of calving ease and low birthweight with big fats. Mother bred a top yearling bull sold to Peak Hill as well as lot 110 in this sale. Very strong fertility traits and her IMF at +3.2 is in the top 5% of the breed. Nice compact type with clean shoulders. Reared the heaviest calf in this group. Mated to Q178 which will leave progeny with real strength.

Comments: A daughter of old Meat Machine, going back to the Waiterenui Alliance bull we had. Good muscle, very good fats, days to calving in the top 10% and an exceptionally efficient mature cow size give a top self-replacing index of 153. Mother is the grandmother of lot 7 as well. This is a heifer we liked the look of and mated by AI to Turihua Avenger.

Comments: Feature lot: We start the offering of R4yr cows with this top dam sired by our top carcass sire M564, who goes back to the great G1000 cow and shows all the carcass data we would expect, with strong muscle and IMF at the top of the breed. Rib fat is in the top 1% of the breed! Out of a Crump cow so has top fertility as well with impressive days to calving. Well balanced and wide across the top with a great spring of rib and capacity about her. Should be a cracking mate to Rainstorme.

Comments: Another beautiful young cow to follow, by P674 who goes back to Braveheart and is breeding so well for us. Out of a cow by Turihaua Loyalty. Terrific depth and hindquarter with wonderful balance and outlook - a top cow in every way. Good fertility, low birthweight and easy doing traits with big fats. Scanned very well for actual IMF. Mated to Q250 which should be a cracking mate.

Comments: Here is a very good daughter of K703. Moderate frame, clean shoulders, and terrific fertility traits with short days to calving at the top of the breed, coming from the sire of dam Goldwyn 017. Dam bred a full brother at lot 19 in the 2023 bull sale, a good bull sold to Greg Hand at \$11,500, and a top heifer at lot 12 in this sale. Exceptional rib (top 1%) and rump (top 5%) fats with very short days to calving and IMF all combine to give an outstanding index. Another exciting mate to Q250.

Comments: Another very well bred young cow by the \$32,000 Woodbank 7017, and out of a terrific old Crump cow H126 who is also the mother of stud sire K703. She was sold to Picton Park Angus in the 2022 female sale. Low birthweight, exceptional maternal and fertility traits, plenty of muscle and easy doing attributes as well as a good IMF give another top index. Days to calving and fats are in the top 5% of the breed! Great length and topline to her, she will be a great mate for Turihaua Tornado.

Comments: We start a second pen of deep, thick, heavy coated R4yr cows with real volume and capacity about them. R847 is by M452, a son of the \$100,000 Rangatira 13-38 who has left progeny with terrific capacity and constitution. She has tremendous coat, head, bone, and feet and with Matauri Reality on the other side of her pedigree she should be a real matronly type. Mother bred a top Crump son sold to Reece Whitelock in our 2023 Bull Sale. Beautiful quiet demeanour, note the grey birthmark on her face. Good figures with low birthweight, short gestation and calving ease. Days to calving is short indicating fertility and fats and IMF are good too. This gives a strong index. Mated to Q250 which should be terrific. Real soundness and quality about her.

Comments: Another cow with terrific volume and capacity, going back to Braveheart and out of a cow by Crump who was sold to Albert Hill Angus in 2022. Terrific pedigree, exceptional fertility, and great easy doing traits with an outstanding self-replacing index which reflects efficient production. Rib fat and days to calving are in the top 5% of the breed while scrotal size and EMA are also very strong, generating a powerful index. Has a daughter in the sale at lot 37. Great width and capacity, terrific soundness, and should be a great mate to Q178.

Comments: A daughter of P700, out of a cow going back to the great Rangatira 13-38 once again. Good spread of figures across the page, strong IMF as we would expect from P700 with fats in the top 5% of the breed and good fertility. This together with her low birthweight and easy calving figures mean another impressive index. Well-balanced, compact cow with real meat in the back end and the same strong coat this whole pen have. Weaned a cracking calf as an R2-year heifer. Mated to Turiroa Panther.

Comments: A daughter of P539, out of a great old cow by Glanworth 16 so plenty of longevity in the pedigree. Mother was sold for an embryo programme in 2021 having bred top bulls to Matt Mckenzie and Palmside Station. Has a daughter in this sale at lot 41. Plenty of length and scale about her, a good topline, upstanding and well balanced. In-calf to P700.

61%	38%	58%	56%	60%	60%	55%	57%	

Comments: Tremendous volume and capacity about this P731 daughter. Goes back to Braveheart, Crump, and Goldwyn. Length, depth, thickness, a terrific backend and good figures across the board giving a good index. Moderate cow weight, strong milk, big scrotal, short days to calving and big fats once again with some IMF to boot. Very sound for a bigger framed cow and a good mate for P700.

Comments: A classic F540 daughter to start the old cow catalogue. Thick, deep, and square with a terrific barrel to her. Great balance, nice topline and some width to her - a good productive type of cow. First calf was a bull sold to Glenquoich Station at \$10,500, she has had 2 daughters retained and there are two more top daughters in this sale at lots 9 and 81 with a cracking calf just weaned. Her mother gave us the full complement of calves over 10 years too. Short gestation, fat and IMF are strong with a milk figure in the top 5% of the Angus breed. Paddock mated to Rainstorme.

Comments: Another very similar F540 type with great volume and capacity. Very clean through the shoulders, goes back to a Stern bull who was a sale topper in his year. Mother A333 was one of our greatest ever cows and produced 6 top sale bulls over 10 calvings. Figures for K804 show short gestation, short days to calving, impressive milk and ample muscle. She has herself produced well including the second-best calf in the mob in 2023 and 4 daughters retained. A very well balanced, stylish cow in-calf to Rainstorme by AI.

Comments: A classic Crump daughter to lead this pen of similarly bred and very strong breeding cows. Deep, thick, moderate framed with strong coats. K944 has exceptional longevity, being out of a cow by Meadowslea 70 who was still going aged 14. She is the dam of Meadowslea Q347, sold to Glen R Angus in 2021 for \$32,000 where he is looking very impressive. Q347 had a perfect structural assessment and has gone on to have semen exported to the USA. She has also produced a heifer sold to Ratanui Angus, and 3 daughters retained. Her mother had 9 calves in 9 years and was sold in one of our first female sales in 2018 after producing a couple of good sale bulls. Terrific fertility figures with days to calving in the top 5% of the breed, strong fats, and IMF in the top 10% with the biggest actual scan of her year. Paddock mated to Rainstorme.

75%	60%	71%	68%	72%	71%	68%	70%	

Comments: Another direct Crump daughter, exhibiting all his characteristic depth, thickness, and exceptional hindquarter. Shows low birthweight, short gestation, and has terrific fertility figures with days to calving, rib fat, and rump fat all in the top 5% of the breed! Out of a cow by Stern 13 which gives her outstanding IMF as well - in the top 10% of the breed. Mother G982 has had 10 good calves in 10 years. The grandmother D135 was sold in the 2018 sale as a 10-year-old having done 8 in 8. Terrific potential here, again mated to Rainstorme.

Comments: A Crump granddaughter this time, also tremendously thick, deep, and productive type. Terrific fertility figures once again with days to calving in the top 10% and rib fat in the top 5%. She bred a cracking heifer sold at lot 1 to Okaka Angus in 2020 for \$6,900 and some daughters retained. Dam produced 3 good sale bulls and goes back to the cow C1015 so some great matriarchs in her background. In calf by AI to Rainstorme which will be an amazing mate.

Comments: Tremendous breeding here, this Crump granddaughter is the mother of stud sire Meadowslea Q250 and by the same sire as the previous lot. This is a top pedigree with 2 shots of Hingia 469 and going back to one of our greatest ever cows A330 – the grandam of Sudeley Viking and Meadowslea P700. Seven calves in seven years which also includes a yearling sold for stud to Westfield Angus in 2018. Goes back to the great cow F530 who was sold to Helmsdale Angus, who also bought her son P556. Outstanding figures with super low birthweight, strong fertility, and IMF in the top 10% of the breed. Beautifully sound with immaculate feet at 10 years old. Paddock mated to Rainstorme.

Comments: Another Crump cow, bred almost identically to K944 and born the same day! Produced bulls sold to Matt McKenzie at \$14,000, a stud bull to Okaka Angus, and another very good bull to Carrick Station. Mother bred a stud bull to Puke-nui Angus and two other bulls to Glen Islay and Mount View at \$10,000 each. Grand dam produced 7 from 7 including J514 sold to Earnsclough Angus where he has had a big impact. K945 has a granddaughter in the heifer catalogue at lot 27, and produced a daughter M406 who is one of our current great cows and the mother of P593, sold to Cricklewood Angus at \$32,500. Exceptional growth figures for an older cow with the fertility traits and fat we expect from Crump. Paddock mated to Rainstorme as well.

68%	49%	67%	64%	69%	69%	63%	62%	

Comments: A nicely put-together cow with nice balance and topline to her. Is by a Crump son so as one would expect days to calving is short with big fats and massive IMF coming through from F737. Has produced a daughter transferred to Westfield Farms and another daughter is in this sale at lot 11. Mother did 8 in 8 including 3 good sale bulls selling to \$10,000 and was sold in the 2022 sale to Picton Park Angus. Clean shoulders, some capacity about her, and mated to Tornado which should click well.

74%	59%	71%	69%	73%	72%	68%	68%	

Comments: Another impressive F540 daughter with the same depth, volume and capacity they all show. Great balance and strong growth figures as well as massive milk, short days to calving, and big fats. Has produced 2 sale bulls, 2 heifers retained, and has a granddaughter at lot 114 in this sale. Weaned the heaviest calf of any cow in the sale this year. Mother E311 bred 8 in 8 including 6 good sale bulls! An excellent mate to our very promising young sire R646.

70%	50%	68%	64%	69%	69%	63%	62%

Comments: A bigger framed cow with clean shoulders, plenty of length and capacity about her. A deep bodied, productive type of cow with exceptional milk - in the top 5%, big fats and plenty of IMF. Produced a stud bull sold to Piko Burn Angus, another good bull in the 2022 Bull Sale, and 2 females sold. Paddock mated to Rainstorme.

71%	58%	69%	66%	70%	69%	65%	65%

Comments: A daughter of old Goldwyn 17, going back to an old Te Mania Unlimited daughter so some real longevity behind her. Two sale bulls produced herself, while her mother produced 2 good sale bulls too in a full complement of 8 in 8. Figures show short days to calving and plenty of IMF. A bigger framed, upstanding cow who should be a top mate to Q250.

FMG
Advice & Insurance

FMG Premier Bull Sale Insurance

What is FMG Premier Bull Insurance?

FMG provides automatic insurance for all bulls auctioned at an FMG Premier Bull Sale up to the value of \$50,000 for 14 days at no cost to the purchaser.

For any bull purchased over \$50,000 talk to an FMG representative.

What is the length of cover?

You will automatically be insured for the specified bull for 14 days. You also have the option to extend the length of insurance to 12 months. Simply tick the “Extend your Premier Bull Insurance” option on the Purchaser Slip. The specified bull is then insured for the remaining period of 12 months at **7.6%** of the purchase price (the sum insured for the bull). If you would like to discuss an alternative timeframe, please have a chat with your local FMG representative.

You don't have to pay today, FMG will invoice you for this additional cover.

What are the benefits?

✓ Infertility	Cover if your specified bull has to be euthanised due to permanent infertility caused by certain accidents, disease, injury, or illness.
✓ Theft or death	We cover your specified bull for theft or death caused by certain accidents, disease, injury, or illness (including while in transit anywhere in New Zealand).
✓ Vet costs	We cover up to \$500 for treatment of your specified bull to prevent death.

What will FMG pay?

FMG will pay the fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.

Bull Purchaser Instruction and FMG Insurance Slip

Please complete this slip and hand to the Booking Clerk before leaving the sale. This slip **MUST** be fully completed to be eligible for the 14 days free Premier Bull Insurance.

Purchaser/Agent full name:			Buyer No:	
If purchasing on behalf of, what is your relationship to owner?			Purchaser's DOB: / /
